INNOVATIVE ENERGY & EFFICIENCY

WHO ARE WE?

In a world where the climate challenge is reaching unprecedented levels, the need to promote responsible and efficient energy consumption is more urgent than ever. In this context, Morocco has committed to an ambitious energy transition strategy by making profound changes to its public policies, especially its institutional and legal framework. However, ensuring energy transition requires specific technical skills, technological vigilance, significant investments, and the ability to assume all associated risks.

Innovative Energy & Efficiency (INEE), a subsidiary of the Caisse de Dépôt et de Gestion (CDG) Group, was created to materialize the CDG Group's commitments to energy transition and embodies excellence in the energy services sector. INEE is a key player dedicated to energy efficiency solutions, renewable energies, and decarbonization.

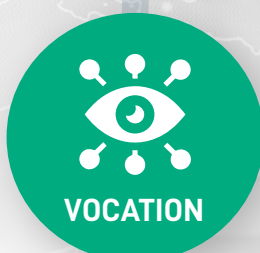

Positioning itself as a key player in the industry, tertiary sector, public lighting, Smart City, transportation and logistics, and agriculture segments

Contributing to the accelerated decarbonization of the Moroccan economy and becoming a national and continental leader in energy transition

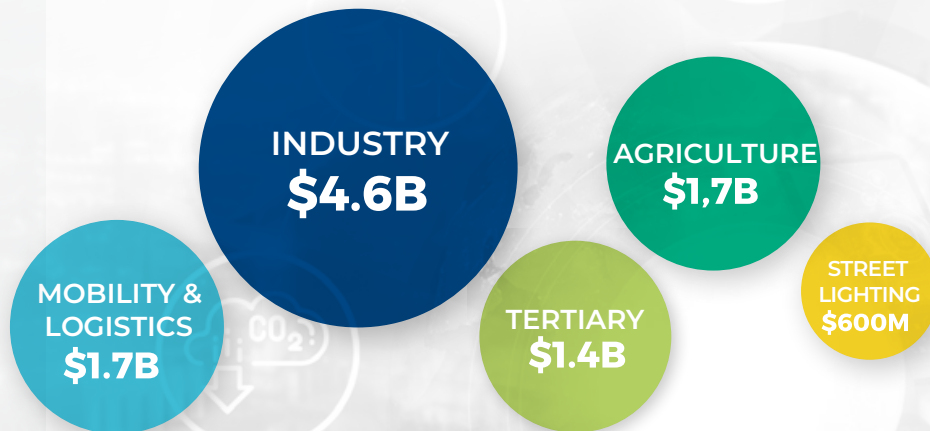

Providing solutions for energy efficiency, renewable energy production, and decarbonization

Achieving the CDG Group's commitments towards energy transition

TARGET SECTORS

Addressable national market of significant size and increasing maturity estimated at 10\$ Billion by 2030

INEE's services are diverse and encompass all links in the value chain, from audit to design and installation of energy-efficient solutions, to performance monitoring, ensuring the assembly and financing of projects. INEE exclusively works on the implementation of energy-efficient projects in strategic sectors such as public lighting, industry, tertiary, transport and logistics, as well as agriculture.

INEE, a key player in energy efficiency, renewable energy, and decarbonization solutions

TERRITORIAL OFFER

INEE offers integrated solutions in the target sectors

INEE offers integrated solutions in target sectors. In the realm of energy transition, territories play a leading role in a greener and sustainable future. Our territorial offer of energy efficiency and decarbonization is particularly designed to meet the needs of regions and local communities, covering essential areas for their decarbonization such as public buildings, public lighting, Smart City, and renewable energy. INEE is committed to supporting territories for a reduced carbon footprint, providing services custom-made for each territorial context. Through in-depth analysis of the specificities of each territory, we develop targeted action plans focused on energy optimization, the valorization of local resources, and the promotion of renewable energies.

INEE's goal is to instill a dynamic of energy transition at the heart of territories, contributing to an eco-friendly territorial future for all.

VALUE PROPOSITION

INEE operates throughout the value chain. Its expertise extends from energy audits to the design and installation of energy-efficient solutions, to performance monitoring, ensuring the assembly and financing of projects.

Audit, Engineering & Expertise

INEE provides a complete diagnosis of the energy consumption of your projects, starting with pre-audits in order to arrive at optimal technical and financial offers.

Financing

INEE offers tailored financing for your energy efficiency project, in collaboration with trusted financial partners.

Sourcing

INEE ensures sourcing based on optimal supplier management, including tracking offers, referencing of qualified suppliers, and negotiation of conditions.

Assembly Offers

INEE provides a project assembly service that includes precise costing of the technical solutions, clear definition of prices and sales conditions, as well as careful preparation of sales documents.

Implementation and Maintenance of Installations

INEE provides a service for the implementation and maintenance of installations that covers all stages, from initial design to continuous maintenance.

Operation & Monitoring

INEE ensures regular monitoring of the performance of installed systems through periodic checks and real-time IT monitoring.

Change Management

INEE supports you in the efficient management of your energy resources by offering targeted training programs, and assisting you in acquiring recognized environmental certifications and labels for your activities.

CAISSE DE DÉPÔT ET DE GESTION

A Group committed to the economic and social development of Morocco

The Caisse de Dépôt et de Gestion (CDG), a public institution founded in 1959, plays a key role in the economic and social progress of Morocco. It is responsible for managing the national savings with rigor and acting in the general interest. Leveraging its expertise, the CDG Group promotes the country's economic transformation, involving itself in regionalization, energy transition, and strategic sectors. Over time, it has asserted

itself as a driver of long-term investments, combining savings management and support for Moroccan development.

Today, its operational framework is based on 5 main areas:

- Savings and providence management
- Territorial development
- Tourism
- Investment
- Banking & Finance

CDG DÉVELOPPEMENT

An important player in sustainable territorial development

CDG Développement was established in 2004 to embody the CDG Group's strategy in territorial development activities. The company provides innovative development tools and efficient products and services that contribute to the progress for the community in all its areas of intervention. It serves as an operator and long-term investor, balancing financial performance with collective utility while placing the country's concerns at the center of its actions.

CDG Développement has undertaken numerous structuring and emblematic projects in critical sectors for the country's development. Through the business expertise of its various subsidiaries, the company contributes to the dynamism and growth of the national economy and positions itself today as a key player in integrated and sustainable territorial development.

Energy Transition Accelerator

Innovative Energy & Efficiency (INEE), a 100% subsidiary of CDG Développement, embodies excellence in the energy services sector. It

provides integrated solutions dedicated to energy efficiency, renewable energy, and **decarbonization**.

CDG GROUP'S COMMITMENTS UN SUSTAINABLE DEVELOPMENT GOALS

Well-being and social cohesion

Environmental challenges

Economic growth

Governance, ethics, and being an internal role model
