

THE KINGDOM OF MOROCCO AND AFRICA : STRENGTHENING BONDS, BUILDING A SUSTAINABLE FUTURE THROUGH REGIONAL COOPERATION

VISION

The Kingdom of Morocco is an African country by history, by culture, by spirituality and by its commitments towards a shared and inclusive sustainable development for the continent. These centuries-old ties have been nurtured through placing the continent at the heart of its strategic choices, consolidating its political relations and establishing diversified and fruitful partnerships.

Under the Reign of His Majesty King Mohammed VI, and as a resolute advocate of South-South cooperation and development led by and for Africa, this African vocation has taken a new dimension. The Kingdom has developed a particular pan-African approach based on the virtues of sustainable development, as well as the establishment of fair and balanced economic relations.

TOGETHER FOR THE IMPLEMENTATION OF THE 2030 AGENDA

Sustainable Agriculture : Our goal is to make Africa self-reliant in food production, offering nature-friendly, top-quality fertilizers.

Natural Resources Conservation : Emphasis on sustainable projects ensures the protection of Africa's invaluable natural resources.

Green Energy : We're amplifying our investments in renewable energy solutions – tapping into solar, wind, and hydro resources, as well as the development of green hydrogen industry and its derivatives – to minimize fossil fuel dependence.

Urban Sustainability : We envision urban spaces with green buildings, streamlined and sustainable public transport, and efficient waste management and valorization within the context of circular economy.

Water Management : Advanced systems are in place to safeguard and optimally utilize Africa's water resources.

Reforestation : Expanding tree-planting drives to battle desertification and rejuvenate natural habitats.

IN PARTNERSHIPS WE TRUST

Fruitful Partnerships: Over forty governmental agreements between Morocco and African countries address Energy Transition and Sustainable Development. These underscore mutual learning, knowledge transfer, technical support, and joint project development.

Real impact projects: Morocco is engaged in several initiatives of the Action Agenda, such as the three regional climate commissions (Congo Basin, Sahel Region and Small Island States), the Morocco-Nigeria gas pipeline mega project, the 'triple A' initiative, the 'Blue Belt' initiative, the 'triple S' initiative, the 'Marrakech Global Partnership for Renewable Energy and Energy Efficiency', 'Desert To Power' initiative, the 'Coalition for Sustainable Access to Energy in LDCs and ODCs', the 'Water for Africa' initiative, the 'African Youth Climate Hub', and the 'African Circular Economy Alliance (ACEA)'.

Innovate to transform: At the forefront of change you can find OCP, a global phosphates and fertilizers leader and a pivotal entity in human-centric African development. OCP's vast partnerships have facilitated farmer training, soil analysis, bespoke crop solutions, and educational outreach, showcased by programs like the OCP School Lab Project.

Shine bright like Africa: The National Office of Electricity and Drinking Water (ONEE), renowned for its electrification prowess, has empowered nearly ten African countries with holistic electrification solutions.

Development of renewable energies: The Moroccan Agency for Sustainable Energy - MASEN is supporting African countries to strengthen institutional frameworks for solar energy, designing techniques and tools for prospecting and site qualifications and executing solar energy projects.

Sahel-Atlantic Gateway: In alignment with Morocco's vision of transforming the Atlantic façade into a hub of human collaboration and economic integration, Morocco has launched, under the High Directives of His Majesty King Mohammed VI, an international initiative aiming at facilitating 'Atlantic Ocean Access for landlocked Sahel Nations' through its road, rail and port infrastructure. This initiative fosters regional integration, economic growth, and improved quality of life, while promoting stability and security. The approach combines interventions in environmental, economic, social, and governance sectors to support sustainable development in the region.

Together for a Brighter Future: Alone we might move swiftly, but together, our strides are vast and impactful. Join us in this mission. Let's shape the future of Africa together.
