

FEEDING A
GROWING WORLD
SUSTAINABLY

OCP

GROWING PROSPERITY

PARTNERSHIP,
LEADERSHIP,
INNOVATION

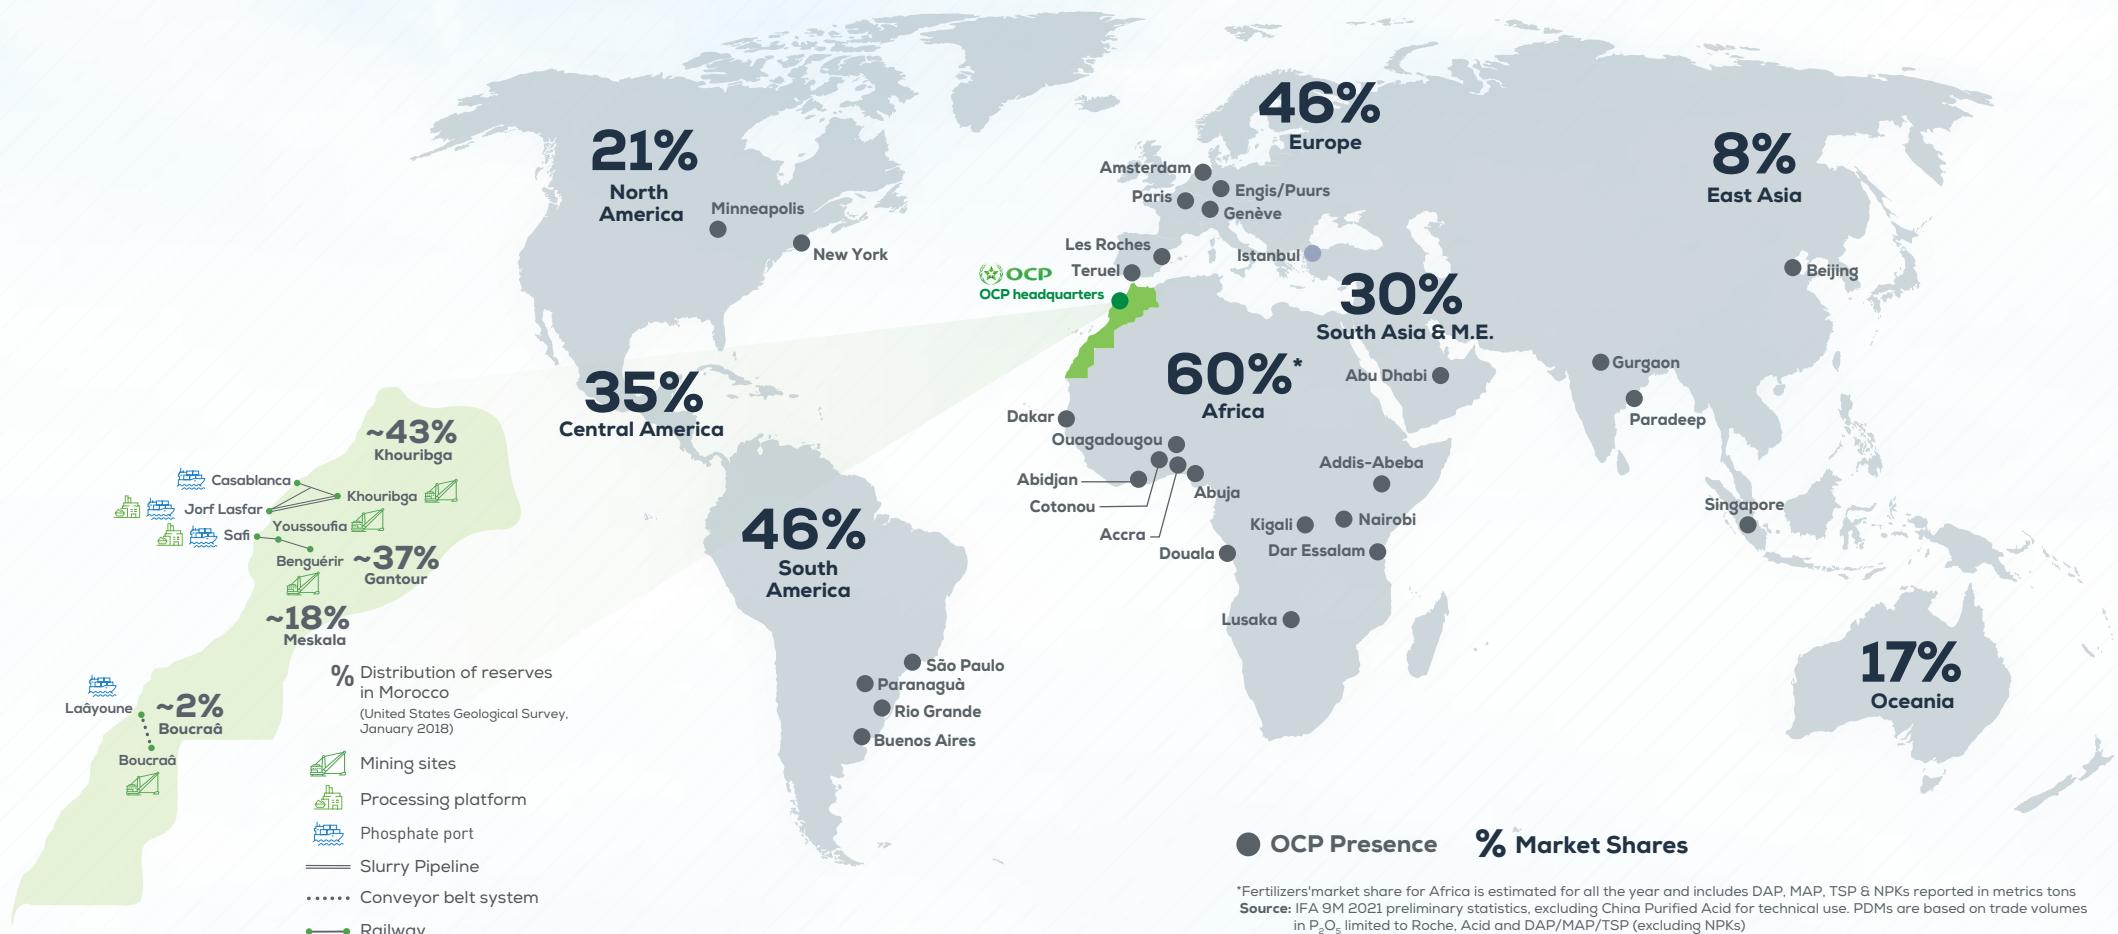

A century of experience as one of the world's **leading phosphate companies**; OCP is a **global player in the fertilizer industry** offering **nutrient-rich solutions** to soil development and local crop needs for farmers.

OCP delivers from mine to market; a fully **integrated value chain** that **champions innovation and R&D**, and provides high-quality and tailored products and services.

Working closely with farmers, **OCP is committed to the sustainable transformation of agriculture**, particularly in **Africa**. We provide extensive outreach and education to foster **social and economic development**, as well as **enrich communities** wherever OCP operates.

FOOD SECURITY

A TRUSTED PARTNER

OCP has unrivaled experience in empowering farmers in some of the world's most food-insecure nations.

As custodians of more than 70% of the world's phosphate, a key plant nutrient, it is our duty to work with farmers, NGOs, and governments across the world to ensure equitable access.

In Africa alone, the OCP Agribooster program was launched in 2018 to inform farmers about more effective farming methods and fertilizer applications. Yields have risen from 30% to 100% since launch, with more than 600,000 farmers upskilled across the continent.

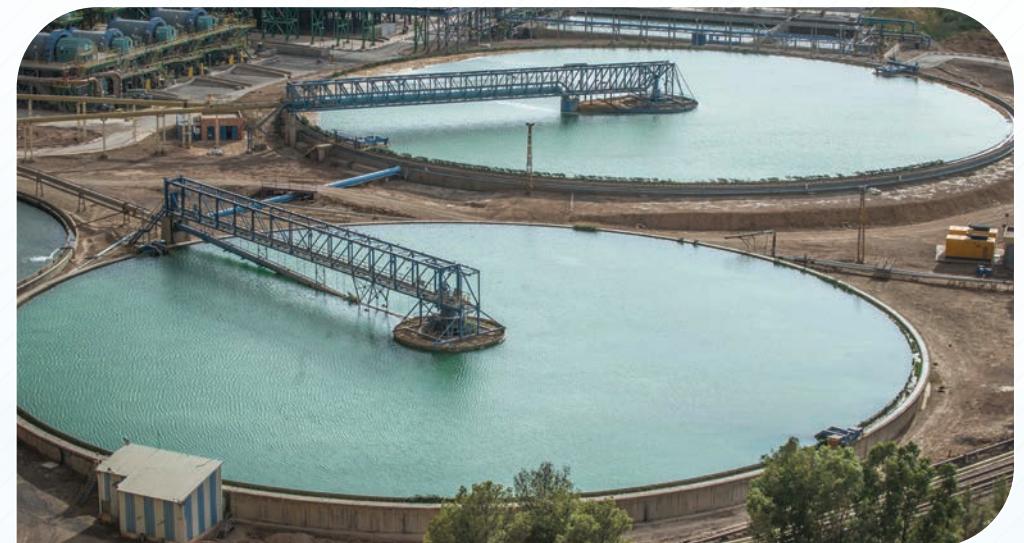

CIRCULAR ECONOMY

FOR A SUSTAINABLE
FUTURE

In 2018, OCP began a major initiative to further enhance our commitment to a more sustainable world. Achieving a truly **Circular Economy** is key to this. Our vision focuses on four pillars: **resource preservation, sustainable production, smart consumption, transforming & recycling**.

The Group takes a **holistic approach to sustainable development** from the preservation of the phosphate resource to **value creation within our ecosystem**:

UNLOCKING AFRICA'S POTENTIAL

THROUGH
AGRICULTURE & YOUTH
EMPOWERMENT

To help **transform African Agriculture**, OCP developed a unique approach based on **customized fertilization**, **farmer-centric support programs**, and **South-South partnerships** based on natural resources complementarities.

BOOSTING AFRICA'S DEVELOPMENT

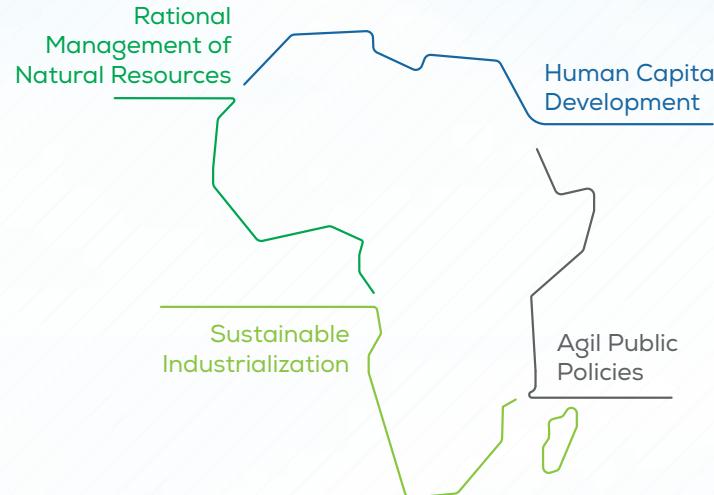

THROUGH RESEARCH AND DEVELOPMENT

Founded to help address Africa's challenges and backed by OCP, Morocco's **Mohammed VI Polytechnic University (UM6P)** in Benguerir near Marrakesh, is a hub of knowledge dedicated to research, high-level education, and innovation to support the continent's evolution.

The university's teaching is focused on areas with a particular benefit to **Africa's development**, including science and technology, management and governance, and medicine.

AFRICA'S CHALLENGES

[Learn more](#)

Mohammed VI Polytechnic University puts experimentation at the heart of training and research by mixing practical and experimental methods, with an ethos of 'learning by doing'.

Mohammed VI Polytechnic University aims at energizing its knowledge ecosystem through a global network of **universities, institutions and industrial actors**, in order to provide access to innovative methodologies and academic programs.

PUTTING PEOPLE FIRST

EMPOWERING
COMMUNITIES AND
YOUNG PEOPLE

◆◆◆

One of OCP's most important initiatives has been **gathering knowledge and harnessing** emotion from its **20,000 employees & ecosystem** to build a new **sustainable impact enterprise model**.

Internally, this new approach was called **the Movement, a program to accelerate innovation** by encouraging every person in the organization to share their ideas for improving it.

Focused on **education as a key lever for the continent's future growth**, OCP continuously **invests in its youth** through **education and empowerment programs** across Morocco, helping improve the continent's vital assets – its people.

Through the power of the Movement, **Act4Community was created**, designed by OCP as a new way to **engage with the local communities by supporting their development**, with a real focus on generating long- term value through **increasing employability and turning ideas into reality**.
